CARDIOLOGY CLINIC LETTER

Patient: Thomas Mahmood

DOB: 1949-12-31 (age 76)

NHS Number: 139 537 6724

Address: 103 Victoria Rd, London, SW1A 1AA

Clinical Findings:

Echocardiogram confirms **ischaemic heart disease** (ICD-10: I25.9). LVEF measured at 32%. Patient reports symptoms consistent with NYHA class II.

Current Cardiac Medications:

- Bisoprolol 2.5 mg — 2.5 mg OD
- Furosemide 40 mg — 40 mg OD
- Spironolactone 25 mg — 25 mg OD
- Aspirin 75 mg — 75 mg OD

Allergies: Patient reports **penicillin allergy** — rash on exposure in 2019. Avoid β -lactams. Aspirin tolerated.

Plan:

1. Continue current heart failure therapy
2. Refer to heart failure nurse for medication titration within 2 weeks
3. Repeat echocardiogram in 6 months
4. Routine bloods including U&E, eGFR in 4 weeks

Dr. James Mitchell

Consultant Cardiologist
