

Riverdale Surgery

Date: 22 Oct 2024

GP CONSULTATION (Locum)

Patient: Christopher Walsh

DOB: 1959-09-27 (age 65)

NHS Number: 999 130 0013

Reason for visit: Routine medication review and BP check. Patient also requests advice on persistent fatigue.

Active Medical Conditions (per practice record):

- **Chronic kidney disease stage 3a**
- Type 2 diabetes mellitus
- Hypertension
- Hypercholesterolaemia

Current Medications:

- Metformin 1 g BD
- Ramipril 10 mg OD
- Amlodipine 5 mg OD
- Atorvastatin 40 mg ON

Allergies: NKDA.

Examination: BP 148/86, HR 78. Weight 82 kg. Mild bilateral pedal oedema. Patient looks tired but otherwise well.

Investigations (today): eGFR 35 mL/min/1.73m²; creatinine 162 µmol/L; HbA1c 7.8%; potassium 5.2 (high-normal); ACR not repeated; haemoglobin 106 g/L (chronic anaemia).

Assessment: CKD stage 3a stable on current medications. Diabetes moderately controlled. BP at upper end of target range. Fatigue likely multifactorial — chronic anaemia, age, possible sleep issues.

Plan:

- Continue current medications
- Repeat U&E in 6 months
- Iron studies and ferritin given anaemia — arrange via routine bloods

- Reinforce hydration and salt restriction
- Routine review in 6 months

Dr L. Park (locum)
