ANNUAL DIABETES REVIEW

Patient: Daniel Ofori

DOB: 1968-03-22 (age 55)

NHS Number: 999 200 0002

Address: 27 Oakfield Road, Birmingham, B12 8QR

Active Medical Conditions:

- Type 2 diabetes mellitus (ICD-10: E11.9) — diagnosed 2019-11-04
- Hypertension (ICD-10: I10) — diagnosed 2017-06-12
- Obesity (ICD-10: E66.9) — BMI 31.2

Current Medications:

- Metformin 500 mg — 1 g BD (started 2019-12-01)
- Amlodipine 5 mg — 5 mg OD (started 2017-07-08)

Allergies: NKDA — no known drug allergies recorded.

Review findings:

Patient attended for annual diabetes review. Reports good adherence with metformin. Reports occasional polyuria and fatigue. No symptoms of hypoglycaemia. Diet review — high carbohydrate intake, limited exercise. Foot exam normal, no neuropathy. Fundoscopy referral arranged. BP 142/86, weight 92 kg, BMI 31.2.

Recent bloods: HbA1c 8.4% (68 mmol/mol), eGFR 78 mL/min/1.73m², total cholesterol 5.2, LDL 3.1, ACR 1.8 mg/mmol.

Plan:

- HbA1c above target; reinforce lifestyle measures
- Refer to dietitian for weight management
- Continue metformin at current dose
- Repeat HbA1c in 3 months — if persistently >7.5% consider escalating therapy
- Annual retinal screening due
