

Birmingham Pathology Services — Laboratory Report

Date of report: 14 Feb 2024

LABORATORY REPORT

Patient: Daniel Ofori

DOB: 1968-03-22

NHS Number: 999 200 0002

Sample type: Venous blood

Sample date: 12 Feb 2024

Requesting clinician: Dr R. Patel (Diabetes Clinic)

Glycaemic markers:

HbA1c: 9.1 % (76 mmol/mol) [target <7.0 %]

Random glucose: 12.4 mmol/L [reference 4.0-7.8]

Renal function:

Sodium: 139 mmol/L [135-145]

Potassium: 4.4 mmol/L [3.5-5.0]

Urea: 5.8 mmol/L [2.5-7.8]

Creatinine: 88 umol/L [60-110]

eGFR: 74 mL/min/1.73m² [>60]

Lipid profile:

Total cholesterol: 5.0 mmol/L

LDL cholesterol: 3.0 mmol/L

HDL cholesterol: 1.1 mmol/L

Triglycerides: 1.9 mmol/L

Urine albumin:

Albumin:creatinine ratio: 2.4 mg/mmol [<3.0]

Comment:

Glycaemic control has further deteriorated since previous result (HbA1c 8.7% in September 2023). Renal function preserved with eGFR 74 mL/min/1.73m² and ACR within normal range. Lipid profile acceptable. Recommend clinical review.
